Optimas® Clearing machine

Paver Joint Cleaner „JointBooster“

IDEAL for the renovation
of paved roads, sidewalks,
squares and historic alleys.

Ideal for streets, sidewalks and squares

The Optimas JointBooster is a specially developed 10-jet joint clearing tool for the renovation and maintenance of paved areas, walkways, squares and historic sites.

Simple blowing out of the pavement joints with compressed air only, without passers-by or vehicles being hit by ejected filling material!

Technical data:*

Size: 750 x 360 x 100 mm

Weight: 25 kg

Industrail compressor is required
minimum 4 m³ air / 5 bar pressure

Stainless steel housing

*Technical changes reserved

Advantages of the JointBooster

- Use without water
- Integrated splash guard on the device
- Controlled discharge of the material
- Uniformly deep cleared joints
- Possible daily output from 500 - 800 m² (5000 - 8000 ft²)
- Foldable guide handle - thus easy transport (also by car).

Care with high pressure!

Pioneering technology through visionary engineering since 1978.
